GUIDELINES FOR PREPARING THE PAPER

PAPER TEMPLATE

- Please use the Word or LaTeX template provided on the workshop website as basis for your paper. The templates are based on the IEEE PES paper template but in the paper format of DIN A4. All templates and necessary forms are provided under the headline "DOWNLOADS" here: http://www.solarintegrationworkshop.org/brussels2015/paper_submission.php
- Maximum number of pages: 8
- Data format: Word (.doc /.docx A4) or PDF (600 dpi, open/without security restrictions) / images need to be of sufficient quality for printing

ORTHOGRAPHIC NOTE OF THE EDITOR

In order to harmonise the different versions for the printed proceedings we kindly ask you to use the following spelling versions:

- When referring to MODELLING/MODELING use the British spelling **MODELLING** (double LL).
- When referring to FARMS/POWER PLANTS use the term **POWER PLANTS** – at least in the paper title

GRAPHICS

- The manuscript's graphics should have resolutions of 600 dpi for monochrome, 300 dpi for grayscale, and 300 dpi for colors
- Graphics should be inserted into the manuscript file rather than using copy and paste
- Do not link to a graphic but insert the graphic into the manuscript instead

FONTS

- The manuscript must use fonts that allow embedding and subsetting (including the base fonts)
- Failure to embed and subset fonts is the biggest obstacle to prepare a proper printable PDF file
- All Type 1 fonts are embeddable
- Only some TrueType fonts are embeddable
- Do not embed fonts in a graphic file

REQUIREMENTS FOR CREATING PDF FILES

- DO NOT use password protection in the PDF file
- All fonts, including the standard (base) fonts, must be embedded and subsetted in the PDF
- In "Settings -> Job Options -> Compression" of Writer/Distiller set the downsampling resolution to 600 dpi for monochrome, 300 dpi for grayscale, and 300 dpi for color
